Compeau Trail	OPEN	0-3"	2"-12"	overflow ice likely, some bare patches, soft or icy trail likely depending on temp

Average snow depth is recorded uncompressed.

Trails in the Chena River State Recreation area are melting out rapidly and winter recreation opportunities are declining. This week's trail report is a broad guideline as conditions are rapidly deteriorating. It will be the final trail report until the trails are closed to motorized use for break-up. It is up to the user's discretion to evaluate the conditions as winter recreation, trail use, and ice-crossing safety are not implied by State Parks.
